**2022 HIMS 2Q Newsletter**

**Announcement**

**V1.7 for the BrailleSense 6 and MINI**

We are thrilled to announce the release of software version 1.7 for the BrailleSense 6 and BrailleSense 6 MINI. The new features include enhancements to Google drive as well as the addition of OneDrive and Dropbox access directly from the File Manager, as well as Google OAuth e-mail support, an updated BookShare Download application, the addition of DAISY recording in the Media Player, and a change to the Record/Play shortcut for accessing voice assistance.

Check out a demonstration of all the new features in SenseCast episode 7: <https://anchor.fm/hims>

**SightCity 2022**

Due to COVID 19, there was no live exhibition in Frankfurt this year. However, HIMS team performed online session via Zoom.

**NIA Exhibition**

Korea Government supports information technology products for blind people. We have exhibitions for people who want to try the products.

**Rehacare 2022**

We have waited for 3 years to participate once again in person in an international exhibition. We are very excited for Rehacare 2022.

**Sight City Frankfurt 2022**

**Sight City Frankfurt 2022**

Due to COVID-19, there was no live exhibition in Frankfurt this year again. However, we were given the opportunity to present via the online exhibition, and we showcased our new products, BrailleSense 6 and 6 mini.

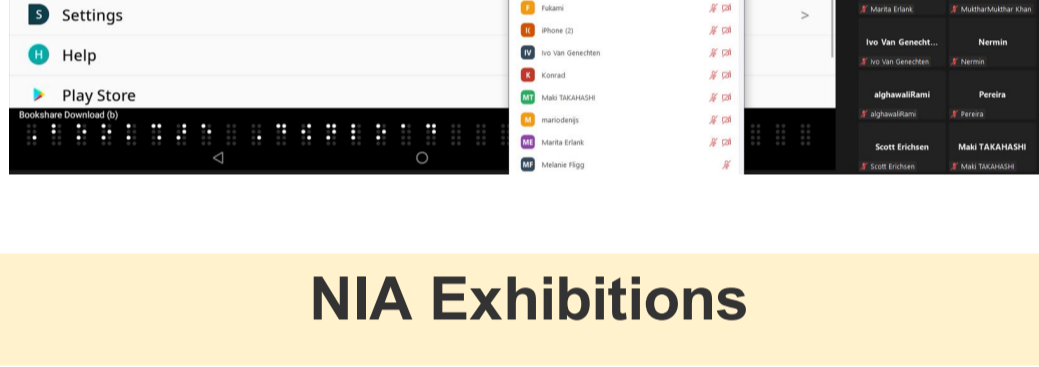

On May 18<sup>th</sup>, we took attendees on a tour of the BrailleSense 6 and MINI, and highlighted the product's new software features, including enhanced Google Drive support and the addition of OneDrive and Dropbox support directly from the File Manager.

We also showcased the effectiveness of using the MINI's internal camera with assistive apps such as Envision AI and One-step Reader to access printed documents, identify objects, and describe what's in the camera's view.

We were gratified during the webinar to have the opportunity to talk with partners and users, and we sincerely hope we all can see each other in person next year.

If you would like to check out the webinar videos, please check the links below.

And more! We have so many advantages you can experience. If you would like to purchase, please contact [hims@selvashc.com](mailto:hims@selvashc.com) or call 82-478-829-3110 anytime!

**NIA Exhibitions**

NIA, (National Information Society Agency) supports information technology products, including HIMS Braille and low vision products as well as other technology devices concerned with the accessibility of obtaining and processing information.

Korea has a special government funding program every year, beginning on May 1st, and running through the summer, and NIA 2022 has returned once again to help those who require access technology products.

More than 1000 people asked us to help them apply for HIMS products, especially our brand new BrailleSense 6 and 6 mini.

In 2021, many exhibitions were cancelled due to COVID-19, but, in 2022, we've begun to attend exhibitions everywhere in Korea, including Daejeon, Seoul, Kangwon-do, Daegu, Suncheon, Busan and even in Jeju Island.

All members of the HIMS sales team have tried to visit many exhibitions to help promote our products, and to assist clients as much as possible when requested, as our client's satisfaction is our success.

Customers are delighted with our new BrailleSense 6 and 6 mini, saying that this product is a sensation for the blind community.

As was the case last year, almost 50% of people who applied to NIA for funding applied for BrailleSense 6 and 6 mini. The results will be posted on July 17<sup>th</sup>, we sincerely hope all people who can benefit to have the opportunity.

**THE first international exhibition after Covid, Rehacare 2022**

Member of MEDICAlliance

We have waited for this almost 3 years. As with many things during the pandemic, all the international exhibitions and seminars we usually attend were cancelled. We have all wished for so long that we could present our products in person, talk with our customers, get their feedback, give hands-on demos, meet with our dealers, and on and on. But alas, the universe had other plans. Finally, this fall, we will have the opportunity to attend the world's largest trade fair for rehabilitation and care, and you can be sure, we will not miss it.

The exhibition will be held from 14-17 September, in Düsseldorf. We do not yet have booth information, but we will be sure to update you when it is available.

During the exhibition, you can try our QBraille 6 products, as well as our unique QBraille XL. Many people are curious about the hybrid of the Perkins and QWERTY keyboard. You can get your hands on it and experience the unique advantages for yourself during Rehacare.

For those with low vision, check out our versatile transportable GoVision series, especially useful for students who are studying in the classroom. If you need to see what your teacher is demonstrating, simply turn the camera toward the blackboard, and the distance camera will capture what is happening, and display it on your screen. Our portable magnifier CANDY 5 HD II will also be featured at the exhibition. This handheld magnifier is easy to use, even for those without technical knowledge, and is customizable for varying degrees of vision loss and a variety of visual environments.

We are very much looking forward to seeing you all, and hope you stay well and healthy until we meet in September.
