

SELVAS Healthcare, Inc. 2023 HIMS Newsletter

Welcome to our 2Q Newsletter! In this edition, we're excited to bring you the latest updates. Join us as we explore the SightCity Conference, and AT Fair in Korea. We're also thrilled to share a major product update with you. Furthermore, we are delighted to introduce a new addition to our Customer Support team, Isabella Gayeong Kim. With a deep passion for Braille technology and a dedication to exceptional customer service, she is here to ensure all your enquiries and support needs are addressed promptly and effectively.

Celebrating Our Successful Return to SightCity Exhibition in Frankfurt, Germany!

We are thrilled to share the exciting news that HIMS made a triumphant return to the prestigious SightCity exhibition in Frankfurt, Germany, after being unable to attend in person since 2019! We would like to express our heartfelt gratitude to everyone who visited our booth and contributed to this remarkable experience. The response we received from the exhibition attendees was overwhelmingly positive and inspiring. We had the pleasure of engaging in insightful conversations, connecting with industry experts, and witnessing firsthand the profound impact our products have on the lives of individuals with visual impairments.

Some of the highlights from our booth at SightCity include:

Unveiling Our Latest Innovations: We showcased our product lineup, including our new SensePlayer and SensePlayer OCR, featuring advancements in accessibility, usability, and functionality.

Demonstrations and Interactive Experiences: Our dedicated team of experts provided in-depth demonstrations and hands-on experiences, allowing visitors to fully grasp the potential and versatility of our Braille, voice, and magnification solutions. The interactive sessions allowed us to forge meaningful connections and learn directly from the experiences and needs of the users.

Networking and Collaborations: We had the opportunity to connect with industry leaders, organisations, and fellow innovators who share our passion for advancing accessibility. These sessions opened doors to potential collaborations, partnerships, and opportunities for future growth and development.

We extend our deepest appreciation to our team members whose hard work, dedication, and expertise were instrumental in our successful participation at SightCity. We would also like to express our sincere gratitude to the customers who visited us. Your feedback, trust, and loyalty have been invaluable in shaping our journey and reinforcing our mission to empower individuals with visual impairments.

KEAD Assistive Technology Fair held in Korea

Our in-person exhibition-related triumphs are not limited to international. Even domestically, in recent years, due to the limitations caused by the pandemic, we've been somewhat limited in our abilities to partake in live interaction and demonstration with our Korean users. We are thrilled to announce that all COVID restrictions have now been lifted here in Korea, and this has offered us an opportunity to participate in the highly anticipated KEAD(Korea Employment Agency for Persons with Disabilities) Assistive Technology Fair in Korea for the first time in four years. We want to extend our sincere appreciation to everyone who visited our booth and helped make this yet another successful and positive experience for HIMS.

We conducted engaging demonstrations and workshops to provide firsthand experiences of our BrailleSense 6, SensePlayer, and magnification solutions. The fair facilitated valuable connections with industry experts, disability organisations, educators, and individuals with disabilities, which we hope will lead to the forging of partnerships to further our collective mission of creating a more inclusive society.

Let us continue to empower individuals with disabilities, celebrate diversity, and build a more inclusive future.

SensePlayer Screen Leader Update

We are very excited about the power-packed update coming to all localisations of the SensePlayer and SensePlayer OCR this summer. If there's one thing we hope you get from this update, it is an understanding that your feedback shapes the characteristics of our products in profound ways.

This update will include the promised Mobile screen reader, and ability to install Android apps, such as Audible, Apple Music, Netflix, etc, for an even more robust accessible media experience in the palm of your hand. However, this update also includes a very long list of large and small enhancements in direct response to feedback we have received from current users of the SensePlayer. Some of these enhancements include, the ability to save both media and audiobook playlists, each with unique characteristics and behaviour, the ability to customize what navigation elements are available in each playback area, the ability to use different reading voices in the DAISY Player and Document Reader from your main TTS, and an upgrade to the BookShare program that allows access using API 2.0. The update also has a very long list of smaller fixes and enhancements, also largely in response to user feedback.

Be sure also to be on the lookout for the BrailleSense 6 Android 12 upgrade, with a brand-new Web browser, also coming this summer.

Announcement

Feel free to reach out to Isabella at isabella.g.kim@selvashc.com with any enquiries, concerns, or feedback you may have related to the repair and service of all HIMS products. She will provide you with solutions within 1-2 working days.
