

HIMS

SELVAS Healthcare, Inc. 2023 HIMS Newsletter

Greetings from HIMS! As the vibrant colours of autumn start to paint the world around us, we are delighted to bring you our September newsletter packed with exciting updates and news from our community. In this edition, we gear up for the vibrant Chuseok festivities and eagerly anticipate our participation in the upcoming AccessAbilities Expo in Dubai. Furthermore, we're thrilled to unveil a game-changing firmware update for our Accessible Multi-Media Player. We also have some exciting news for our BrailleSense6, with an Android update that promises to elevate the functionality of our flagship product. Let's dive right in!

Chuseok Greetings and Office Closure Notice

As we approach the autumn season, we'd like to take a moment to share some insights about Chuseok, a significant cultural celebration in Korea, and announce that our office will be closed during this period.

Chuseok: A Celebration of Harvest and Family

Chuseok, also known as Korean Thanksgiving, is a time-honoured tradition that holds deep cultural significance. It is a three-day harvest festival celebrated on the 15th day of the 8th month of the lunar calendar. For those of you using the solar calendar that means it generally falls anywhere from the beginning of September to the beginning of October but has different dates each year. On this holiday, families come together to give thanks for the bountiful harvest, pay respects to ancestors, and enjoy special traditional dishes.

Office Closure Notice

In observance of Chuseok, our offices will be closed from 28th September to the 3rd of October. During this period, there will be no regular business operations. Our team members will be taking this time to celebrate with their families and loved ones. We appreciate your understanding and cooperation. We will resume regular business hours on the 4th of October.

We extend our warmest wishes to you and your families for a joyful and prosperous autumn and harvest season.

Join Us at AccessAbilities Expo 2023 in Dubai!

We are thrilled to announce our participation in the upcoming AccessAbilities Expo 2023, set to take place in Dubai from the 9th to the 11th of October. This event is a significant milestone in our ongoing commitment to advancing accessibility and inclusivity, and we are eager to have you alongside us. Our team will be on hand to showcase our latest products, answer any questions you may have, and explore potential opportunities for collaboration.

Event Details:

Date: 9th - 11th October 2023
Venue: DWTC (Dubai World Trade Center) Dubai, UAE
Booth: Hall 6, 6346

Should you require any further information or have specific queries ahead of the event, please do not hesitate to reach out. We look forward to seeing many of you there! Thank you for being an essential part of our journey towards a more accessible world.

SensePlayer V2.0 Update

In August, we released an upgrade for our SensePlayer and SensePlayer OCR multi-media players, that features functionality that radically changes the scope of these devices, and changes the landscape in terms of what is expected and/or possible with accessible multi-media gadgets such as this. The SensePlayer V2.0 update, in addition to implementing many requested feature enhancements, also includes a Mobile Screen Reader, and the ability to install compatible Android applications via an included App Installer, or directly from the File Manager. This means that the SensePlayer, in addition to its Media and DAISY Players, Web and FM Radios, Book Reader, Pod catcher, Library Services, File Management, and various other utilities, now also offers and intuitive tactile interface to apps like **Audible, Apple Music, Dropbox, Zoom, BBC Sounds, and Netflix.** While the SensePlayer is not a Google-certified device, there are many many compatible multi-media applications that will allow you to make SensePlayer your own, and customize it with the services you use most and love best.

BrailleSense 6 Upgrade From Android 10 to 12

Coming this autumn, HIMS will be releasing an upgrade to the BrailleSense 6 and BrailleSense 6 MINI that will enhance the performance and ensure the longevity of the BrailleSense for several years to come. This upgrade will update the operating system of the device **from Android 10 to Android 12**, and will also include additions like a new To Do List app, our traditional collection of BrailleSense Games, several enhancements to the e-mail program to make it more modern and robust, and the ability to dictate text in to the document editing areas of the BrailleSense. This upgrade also offers more optimal overall performance and upgrades the accessibility and usability of 3rd party Android apps.
