

SensePlayer and SensePlayer OCR

SensePlayer OCR is a modern multimedia player and streaming device, portable scanning and reading solution, and a tactile remote control for your smart phone or tablet; offering intuitive navigation and operation with tactile keys rather than the traditional touch screen found on most modern mobile devices. Classical and contemporary tactile buttons are paired with haptic, sound and speech feedback to provide efficient and instinctive operation for the visually impaired.

Features

Innovative Smart Connection

Unique to the SensePlayer is an innovative Smart Connection function that allows you to use the tactile keyboard of the SensePlayer to navigate, operate, and enter text into your smartphone or tablet, with instant tactile orientation, resulting in more effective command and control without needing to explore your touch screen. Optionally, you can also send the audio of your smart device via the smart connection, allowing you to directly listen to VoiceOver or TalkBack via the SensePlayer, make and receive phone calls, call and interact with your chosen voice assistant, and even record the audio from your smart device directly to your SensePlayer.

SensePlayer plays All The Things!

The SensePlayer can play back a variety of file types, including DAISY books, document files, music, video files, audio book files, Podcasts, and both FM and Internet Radio.

Download and Stream

Search for and download books and podcasts, or stream Internet Radio stations with modern Wi-Fi connectivity. Use the SensePlayer's Mobile Screen Reader and App Installer to add and utilize your favorite multi-media streaming services, including Netflix, Spotify, Apple Music, Audible, etc.

Capture your world in clear, realistic stereo!

Record a class lecture, musical performance, or capture special moments with your family and friends in true-to-life stereo clarity with the built-in stereo microphones, or external stereo mics, mixers and other sources via USB C.

Your Content Your Way

Listen to your books and media with precisely tuned stereo speakers or Bluetooth and auxiliary headphones and external speakers. Hear your music the way you want to hear it with the SensePlayer's finely tuned EQ and Effect options. Read DAISY and document content aloud using a wide variety of high quality, human-sounding Nuance Vocalizer Voices in Multiple languages and dialects.

Convenient Accessible Utilities

SensePlayer offers additional convenient utilities including a File Manager, Calculator, Memo, Alarm, Stopwatch, Countdown Timer, and Sleep Timer.

Portable OCR

SensePlayer OCR includes all of the above, with the addition of a conveniently centered 13 megapixel camera, offering an intuitive, simple and intelligent scanning experience for a variety of printed materials, including books, brochures, newspapers, magazines and paper documents.

※Available on SensePlayer OCR model only.
